# Welcome

## Welcome to TechnipFMC

We believe in supporting our clients and ensuring their ongoing business successes. TechnipFMC provides comprehensive training for customers worldwide. Our training courses reflect the experience and knowledge gained working nearly 100 years in the oil and gas industry.

The courses are taught by the same measurement specialists that design, engineer, and service our equipment. We offer you and your employees a superior training environment that will assist you with safe, reliable, and efficient system operation. The training courses use our demonstration equipment and simulators to provide an in-depth, hands-on experience. Our training courses offer students valuable knowledge and practical expertise that allow students to autonomously install, parameterize, maintain, and repair your system.

TechnipFMC also offers customized courses either at your place of business, a TechnipFMC training location, or a location of your choice. We look forward to sharing our knowledge and experience with you at our training courses. If you require other training services, please do not hesitate to contact us.

<b>Thursday</b>	System description, installations manual, parameter setting, test		Simulator
<b>Friday</b>	Simulator		

\* Subject to modification of the agenda and/or topics without prior notice

\*\* We recommend arrival on the previous day

TechnipFMC's policy of practical training is an excellent learning opportunity. Our Aftermarket Group has found that Best Measurement Practices experience builds a solid working knowledge of measurement systems and products for the client, producing on-site personnel who are knowledgeable and comfortable with the operation and maintenance. The courses detailed here can also be customized to meet a client's particular need by combining courses and focusing on their installed equipment. These unique and individualized courses can be quoted upon request to companies looking for a session held at their site, a centrally located facility to help reduce travel costs, or at one of our facilities located in Germany, Norway, and the US.

This training is aimed at clients with an existing installed base and an on-staff team of operations and maintenance personnel. Development of these training programs will result from close interaction with our team to assess the current skills and competencies of a client's staff against "industry norms" for the particular level of the technician.

# Terms and Conditions of Participation

## General

The participation in training courses organized by Smith Meter GmbH - F.A. Sening GmbH (hereinafter called the "Organizer") is agreed with his contractual partner, or the participant respectively (hereinafter called the "Customer"), in accordance with the following Terms and Conditions of Participation. Any Terms and Conditions of the Customer which are different from the below Terms and Conditions are not applicable unless the Organizer has accepted these and agreed in writing. Any modifications the Customer makes to these Terms and Conditions require written approval of the Organizer prior to the confirmation of participation.

## Registration

Registration can be made in writing (by letter, fax or E-mail), or by phone call to the Organizer's Service Dept. The Organizer will confirm each registration in writing. Upon receipt of this confirmation at the Customer's location, the contract will be binding for both parties.

## Cancellation by Customer

Any written cancellation will be accepted free of charge as long as it is received at the Organizer no longer than 10 working days before the training course starts. In any case that a cancellation is made later than 10 days before the start of the course - irrespective of whether for important reason or not - the full training fee is due.

## Cancellation by Organizer

The Organizer reserves the right to cancel a course - e.g. because the number of registrations received is too low. In such a case any fees the Customer may already have paid, will be returned. No claims above this will be accepted. Before canceling the registered participation and returning the fee, however, the Organizer, provided the Customer agrees, will try to enable participation in a training course dealing with the same subject at a different date.

## Modifications

The Organizer will carry out the courses as laid down in the Training Catalog. However he reserves the right to make certain amendments, e.g. change of lecturer, of subjects, of date or venue.

## Training Fee

The training fees apply as stated in the training catalog, plus VAT as in effect at the time of invoicing. Training fees cover the lectures and active training sessions including documentation and - if required - the use of hardware, as well as beverage and lunch during training hours. The invoice is due upon receipt without any deduction.

## Warranty/Liability

Lectures and active training sessions are structured in such a way that any participant, provided he has the required skills and pays attention, will reach the training goal. The Organizer will not be liable for the training success. Irrespective of the legal issue, the Organizer will only be liable for damages originating from deliberate action or gross negligence of one of his legal representatives or senior managers. In case of gross negligence, the liability is limited to foreseeable damages. The Organizer will not accept any liability for consequential damages.

## Copyright

Regarding training documentation, including translation and reprints - in full or as an extract -, all rights are reserved for Smith Meter GmbH - F. A. Sening GmbH. No reproduction whatsoever may be made without prior written consent of Smith Meter GmbH - F. A. Sening GmbH. The Customer will duly inform and obligate the persons registered for the training course. The Customer will be liable for any damages arising from an offense against this clause.

## Protection of Personal Data

By signing the registration form, the Customer agrees to his personal data being stored and processed as long as required to fulfill this contract.

## Security

The Training Participant is obliged to follow the safety regulations applicable at the venue of the training.

## Governing Law

Provided the Customer is a merchant, and as long as the legal case is not one of legal proceedings, any disputes will be governed by the German laws, with the court of competency being in Pinneberg. The Organizer may also file a suit at the Customer's legal headquarters.

## Severability

Invalidity of any terms of participation shall not affect the viability of any other terms.
