

FMC Technologies

FMC Technologies and Our Measurement Solutions Legacy Brands

FMC Technologies, Inc. is a global leader providing mission-critical technology solutions for the energy, food processing and air transportation industries. Its **Measurement Solutions** business unit excels in process systems, measurement technologies, transportation, and custody transfer of gases and liquids in the oil and gas industry. FMC Technologies employs approximately 11,000 people and operates 33 manufacturing facilities in 19 countries.

FMC Technologies Measurement Solutions sets the standard for global **Best Measurement Practices** by designing, manufacturing and servicing the precision products and systems used to measure and control liquids and gases in industrial applications. The **Smith Meter**[®] brand is known worldwide for its ability to produce reliable, accurate and consistent measurement results. Similarly, our **Sening**[®] brand tank truck components and systems are trusted to provide safety and environmental protection while ensuring accurate measurement during the transport and transfer of liquid products.

FMC Technologies

Ancillary Services for Gas Measurement

Ancillary Services for Gas Measurement

As the leading manufacturer of flow measurement solutions for the global oil and gas industry, Measurement Solutions, a division of FMC Technologies, possesses unrivaled product knowledge and application expertise gained from decades of measurement experience. Offering a complete line of technically superior liquid and gas measurement products, we set the standard for measurement accuracy.

FMC Technologies, Measurement Solutions Division in Thetford, UK, has a long-standing tradition in the manufacture, supply, and after-service of Gas Metering Systems based on Differential Pressure Measurement techniques. In addition to the large range of Orifice Fittings (Single and Dual Chamber) and Venturis, we also offer:

- Replacement of Orifice Plates and Fittings or other spare parts
- Calibration of Orifice Plates
- Calibration of Meter Runs
- Upgrade of Existing Fittings, including Plug Valve Replacement
- Long term Service Contracts
- Inspection Services
- Technical Services
- In-house or on-site training programs
- Hydrostatic Testing
- Flanges, Spool Pieces and Bolts for Testing

We have service and support engineers fully qualified for offshore work and have worked with many International Operators such as Shell, BP, Marathon and Statoil.
